The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,4,5,7-9,12,15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gugel et al in view of Spadaro, Fawcett and Kelpac. Gugel shows the claimed ladder with the exception of the claimed lighting assembly being mounted on the deck of his ladder and the switch. Fawcett shows the claimed lighting assembly for mounting on a ladder. Spadaro teaches the mounting of a lighting assembly on the deck of a ladder. Kelpac shows a switch 64 on an outlet. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Gugel with a lighting assembly as taught by, Fawcett, and to mount the lighting assembly on his deck, as taught by Spadaro, to illuminate his work area from the deck of his ladder, and to comprise a switch on his outlet, as taught by Kelpac, to selective provide power to his outlet. The examiner takes official notice that the use of conduits as a covering for power cords is a conventional practice, and to provide a conduit to Gugel, as is conventional would have been an obvious mechanical expedient to prevent damage of the cord. The examiner

takes official notice that the claimed legs attachment is a conventional stepladder construction. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the legs of Gugel to be connected to his deck as claimed, as is conventional, to facilitate storage. To provide an additional of the lighting fixture, as taught by Fawcett, to provide additional lighting, would have been an obvious mechanical expediency by the duplication of Fawcett's teaching.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the

advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
